

THE DIVIDEND TIMES

Divi-X Index Breakdown

For the month ending:

November-2017

www.TheDividendTimes.com

Figures are from Chapter 2 of "The Dividend Times: An Introduction to The "Divi-X" System" updated daily

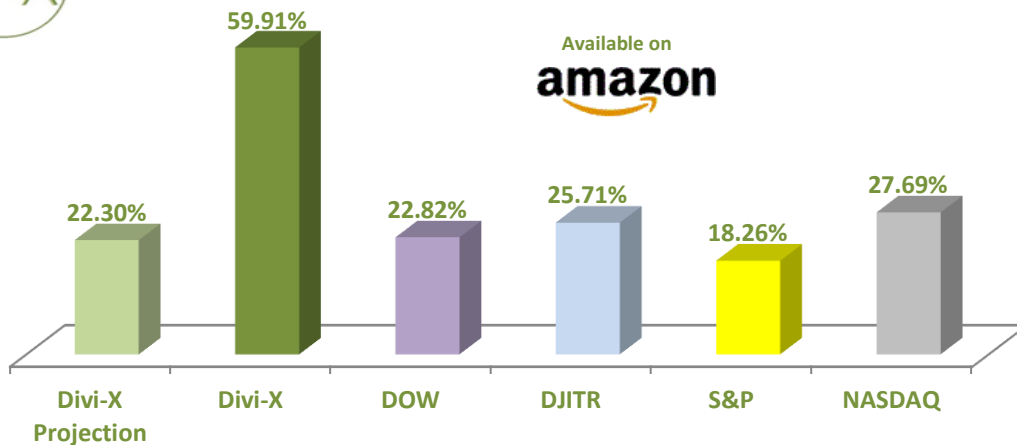

In 'The Dividend Times: An Introduction to The "Divi-X" System,' we showcased several scenarios using the "Divi-X" system on 29 out of the 30 Dow stocks that paid dividends at the time of writing (Cisco didn't pay dividends). Chapter 2 focused on the most conservative approach featured in the book and we continue to track the results today. In other words, these are the results of the "lowest" performing use of the "Divi-X" System in the book.

Using "Divi-X" Compared to 'All Cash'

Since Inception 2009

YTD Divi-X* Returns vs Other Major Indices

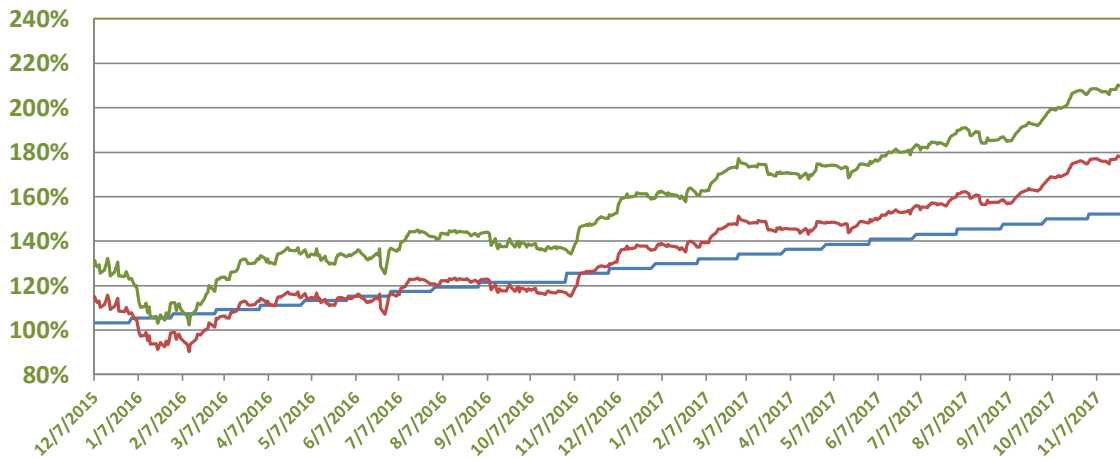

The "Divi-X" Index is currently outperforming 'All Cash' by

33.59%

In other words, if you made the same investments using all cash, your performance would be trailing the "Divi-X" performance by that much.

— Projected Rtrn — DOW + Dividends — DOW w/Divi-X

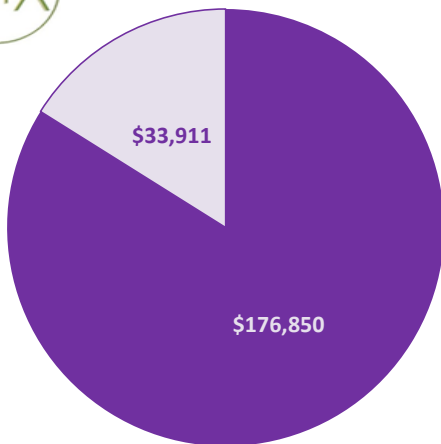

The average "Divi-X" Outperformance over 'All Cash' is:

48.74%

Total Returns Since Divi-X Inception 2009*

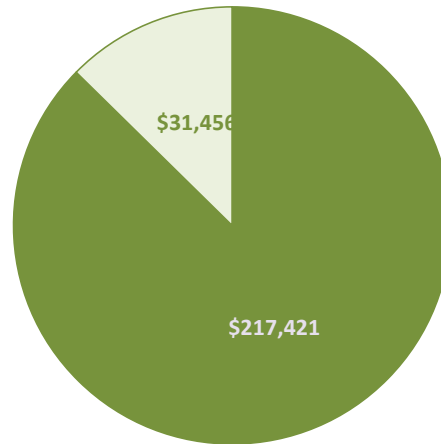

Without Divi-X

■ Capital Apprec. □ Cumulative Dividends

\$210,761.04

"Divi-X"

■ Capital Apprec. □ Cumulative Dividends

\$248,876.58

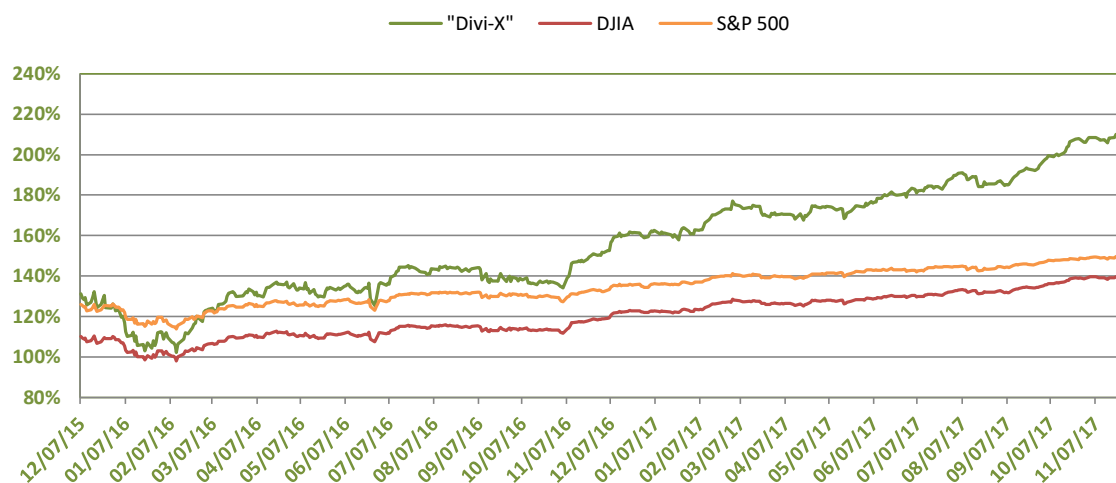

*Results are based on 100 shares of each dividend paying stock in the DOW since 2009. Dividends are 'NOT' reinvested or returns would possibly be higher.

Divi-X Individual Returns Since Inception June 2009**

	"Divi-X"	Without		"Divi-X"	Without		"Divi-X"	Without
